

## Compost Calculator

Spreading leaf compost on your lawn will improve the quality of the soil and will benefit your lawn for years to come. To quickly figure out how much compost to order and spread on your lawn, measure the area of grass and refer to the chart below.

Lawn Area in Square Feet	Cubic Yards of Compost		Lawn Area in Square Feet	Cubic Yards of Compost
1000	0.4		21000	8.4
2000	0.8		22000	8.8
3000	1.2		23000	9.2
4000	1.6		24000	9.6
5000	2		25000	10
6000	2.4		26000	10.4
7000	2.8		27000	10.8
8000	3.2		28000	11.2
9000	3.6		29000	11.6
10000	4		30000	12
11000	4.4		31000	12.4
12000	4.8		32000	12.8
13000	5.2		33000	13.2
14000	5.6		34000	13.6
15000	6		35000	14
16000	6.4		36000	14.4
17000	6.8		37000	14.8
18000	7.2		38000	15.2
19000	7.6		39000	15.6
20000	8		40000	16

If your lawn is already in pretty good shape and you're just looking to help it remain strong and healthy, you can use less compost and still see some good benefits. If your lawn is in particularly bad shape, you can go a little heavier. Just make sure that you do not bury any areas of the lawn. The compost should always be thin enough to settle down in between the grass blades, so the blades stand up through the compost.

**Lower Fairfield County: 203-847-1241**  
**Upper Fairfield County: 203-244-9811**

**Hartford County: 860-269-8638**  
**New Haven County: 203-404-7194**
